

The American Express® Corporate Purchasing Card

The intelligent solution for improving purchasing and payment processes

Payment solutions that save time and money.

Everyday purchases as well as regular office material orders cause a lot of work for Companies. By integrating all parties involved in the process – the purchaser, the supplier and accounting, the Corporate Purchasing Card has proved to achieve considerable savings with such purchases and their processing.

American Express® Corporate Purchasing Card

Would you like to reduce complicated billing processes for purchases to one clear consolidated bill and improve the administration of purchases?

The American Express Corporate Purchasing Card (CPC) offers your Company greater control and convenience when it comes to your everyday business spending and can help to optimise cash flow management.

Convenience

- More convenience for ad hoc or regular business purchase by employees

Control

- Greater spend control and full transaction reporting through standard invoice detail delivered by a merchant swipe terminal and full line item data if used at authorized suppliers
- “Card level” control and Category Code Merchant blocking, preventing unauthorized spend at your selected merchants

Reconciliation

- Web-based transaction reconciliation through our online Corporate Account Reconciliation system (CAR) to assist in the management of payment process

With the Corporate Purchasing Card, Companies can improve the control of non-strategic purchases by being able to centrally pay, electronically book and analyse bills in detail.

Also benefit by combining the Corporate Purchasing Card with tools such as:

- Billing Support Files (electronic invoice data)
- American Express Corporate Account Reconciliation (online tool for reconciliation)
- American Express @Work (web-based management information)

The most important benefits

- Reduction in number of bills and suppliers
- No manual compilation of paper bills
- Central booking of all orders, driving cost savings
- Simple linking to accounting systems
- Defined individual authorization for daily business (who may purchase how much of what and where)
- Better purchasing conditions and avoidance of non-priority suppliers
